

Dear Planning

the following applications are no longer available to comment on the CC Planning website so here are our comments which I should be grateful if you would add. Thank you.

PA19/02731 - supported.

PA19/03044 - supported and with the following comments:

1. GWR is requested to provide signs clearly displaying the opening times of the ticket office as this is causing confusion;
2. could the new concrete post and chain link fence outside the copse please be removed and replaced with fencing more in-keeping with the listed railway station (spear head railings for example); and
3. we noticed a 'trap door' - see photo - and suggest that if it of historical importance, that it should be signed to say what it is for public interest as a feature of the station.

PA19/03672 - supported.
